

Secondary Data Analysis: Get In Where You Fit In

This session will feature dynamic presentations by investigators who have expertise in the use of secondary data analysis, including Centers for AIDS Research (CFAR) data, to advance research in the prevention and treatment of HIV/AIDS. Presentations will cover the following topics:

- Advantages and challenges of secondary data analysis sets
- How to establish a collaborative program of research using this approach
- Practical tips on how to maximize the use of CFAR and healthcare system datasets to advance HIV/AIDS-related nursing science

Presenters and attendees will engage in discussions regarding common pitfalls and barriers involved in the use of secondary data analysis and strategies to overcome these challenges. The session will include presentations on the use of CFAR clinical data including CNICS, MACS/WIHS, and related clinical systems. Participants will have the opportunity to discuss their own ideas regarding use of these datasets and receive feedback from session attendees. (Limit 40 participants)

Workshop Presenters

Greer Burkholder, MD, MSPH
Assistant Professor
University of Alabama at Birmingham
Division of Infectious Diseases

Phyllis Tien, MD, MSc
Professor
University of California San Francisco
Division of Infectious Diseases

Allison Webel, RN, PhD
Assistant Professor
Casewestern University
Bolton School of Nursing

Julie Zuniga, PhD, RN
Assistant Professor
University of Texas at Austin
School of Nursing
