Dear Colleague,

The ANAC2018 conference committee welcomes you to Denver! Your conference planning committee along with the local Denver ANAC chapter is excited to welcome you to our annual conference. As we reconnect with friends, colleagues and new collaborators we ready ourselves to learn and discuss all manner of topics related to domestic and international HIV and viral hepatitis care, treatment and prevention. As always, our conference sessions have been designed to address current issues in HIV and provide a vision of the future. This year, ANAC2018 is pleased to provide participants with the opportunity to learn about the latest and most pressing issues that impact people and systems that are responding to the HIV epidemic in our neighborhoods, clinics and communities locally and globally. One of our most pressing issues is raising our voices to demand equity for all people.

We are fortunate to have some of the leading experts in the field of nursing, medicine, policy, pharmacy and education who will share their expertise. Our speakers will focus their presentations on our most highly-impacted communities, including people of color, immigrants, women, transgender persons, adolescents and persons who use drugs.

We are also pleased to offer attendees the opportunity to participate in several pre-conference events: a workshop focusing on using large data to answer research questions - an innovative model for providing PrEP via Telehealth, Medication-Assisted Treatment for substance use disorders and more. This year we are trying something new and bringing some community models of care to our conference site.

The Denver chapter has been working to create a fun and lively gala as well as our annual Celebration of Life. The Celebration of Life is always a meaningful event where we can come together to acknowledge those whose lives have ended and that we want to celebrate. We welcome everyone to attend.

While in Denver, we hope you will spend time getting to know the area including the LoDo (lower downton), Union Station, Denver Museum of Art, and the 16th Street Mall. Of course, we also hope you will enjoy some of the award-winning local restaurants and nightspots — Mile High Hamburger Mary’s, anyone?

Many thanks go out to our colleagues on the national conference committee: Lisa Lawrence, Co-Chair; LaRon Nelson, Research Chair; Ann Gakumo, Research Co-Chair; Shannon Perret; Christopher Fox; Peter Prutch; Willie Roberts; Michael Sanchez; Glenda Bagus; Julie Schexnayder; Jason Hindman; Natalia Villegas; David Golas; Jim Kozman; Diane Clements Walton; Allison Webel, Director of CNE; and Joseph Perazzo, Nurse Planner. An extra shout out to Diane Clements Walton who helped us track decisions and more. A special thank you to Erin Myers and Carole Treston at the national ANAC office without whose leadership, none of this would be possible. Thank you to the ANAC board of directors who have been continually engaged and supportive of the committee. We would also like to thank the Denver chapter for serving as our host committee during conference. Finally, we are grateful to you, our participants. Enjoy ANAC2018!

Carol Dawson-Rose, Conference Co-chair  Lisa Lawrence, Conference Co-Chair

Follow us on social media throughout conference and the rest of the year! Use #ANAC2018 to share your thoughts about speakers, topics and what you have found interesting.

9 – 10 a.m.
Room: Saratoga

**Rural and Frontier Nursing**
9 – 10 a.m.
Room: Mattie Silks

Unless otherwise indicated as closed, all conference attendees are invited to attend committee meetings.
It is with great pleasure that I welcome you to the annual ANAC conference in Denver. Over the next few days, you will hear from fellow ANAC members who are experts in HIV prevention and treatment. Your contributions during Q&A and through the evaluations are so important to us.

We are also proud to share with you the updated ANAC public policy agenda, developed by the ANAC policy committee, included in your conference bag. Our public policy agenda reflects our holistic approach to the intersection of human rights and health care. Part of what initially attracted me to ANAC was the legacy of advocacy for the health, welfare and rights of people living with HIV. ANAC nurses were at the forefront of advocacy for patients with AIDS early in the epidemic and that continues.

This undeniable link to human rights for people living with HIV has defined the AIDS advocacy movement. The related concepts of patient empowerment and patient-centered care began in the struggle against the HIV/AIDS epidemic. Central to this is the meaningful involvement and the leadership of PLWH in the movement.

An important piece of this originated here in Denver at a Gay and Lesbian Health Conference in 1983. A group of men with AIDS developed and presented a set of principles that has defined the response to AIDS and changed approaches to health care overall. This seminal document, known as the Denver Principles, are the foundation for the self-empowerment movement for PLWH. From the Denver Principles:

We condemn attempts to label us as “victims,” a term which implies defeat, and we are only occasionally “patients,” a term which implies passivity, helplessness and dependence upon the care of others. We are “People With AIDS.”

The Denver Principles also includes a call for others to: 1. Support us in our struggle against those who would fire us from our jobs, evict us from our homes, refuse to touch us or separate us from our loved ones, our community or our peers, since available evidence does not support the view that AIDS can be spread by casual, social contact and, 2. Not scapegoat people with AIDS, blame us for the epidemic or generalize about our lifestyles.

These opening sentences call attention to the reality of living with AIDS in 1983, including the burden of fear and stigma. It was overwhelming then and unfortunately, still impacting too many PLWH today. We continue to have work to do here. But I want to salute our colleagues who were early adopters and those that continue to uphold and support the Denver Principles. You are part of that group — even if you are not familiar with the historic Denver Principles. But nurses’ contributions are noticed.

“Nurses were the heroes, the people I trusted the most to care for my friends, they were the embodiment of what the Denver Principles were about- to support people living with AIDS to live their best lives and this continues today” — Paul Kawata, Executive Director NMAC, co-founder of National Association of People Living with AIDS.

I join Paul in saluting you and your compassion that distinguishes our evidence-based care. I am grateful to be your colleague. I hope you enjoy the conference.

Warm regards,

Carole Treston
Executive Director
Association of Nurses in AIDS Care

ANAC 2018 Conference Objectives

1. Analyze strategies to advocate for advancements in HIV/AIDS care and prevention within the existing policy environment
2. Discuss innovative biomedical, psychosocial and behavioral research in HIV with an emphasis on:
   - Symptoms
   - Self-management strategies
   - End of life and palliative care
   - Prevention and wellness
   - Technological modalities
   - Social determinants
   - Intervention strategies that impact disparities in HIV incidence and health outcomes
3. Evaluate the global impact of nurses and other healthcare professionals in addressing HIV prevention and care, health disparities, HIV risk and social determinants of health
4. Demonstrate an enhanced ability to care for key populations at risk for, living with or affected by HIV and related co-morbidities
5. Increase capacity of nurses and other healthcare professionals to identify, treat and care for individuals at risk for and/or living with viral hepatitis

Registration and App Help Desk
All attendees must register for the conference. The registration desk is clearly marked and is located on the lower level and is open during the following hours:

- Wednesday: 8 a.m. – 5 p.m.
- Thursday: 8 a.m. – 5 p.m.
- Friday: 8 a.m. – 5 p.m.
- Saturday: 8 a.m. – 1 p.m.

What the Registration Fee Includes
The registration fee includes admission to:
- All non-member registrants will receive a one-year ANAC membership
- CE contact hours
- Lunch in the exhibit hall
- Coffee breaks
- CE contact hours
- All non-member registrants will receive a one-year ANAC membership

Name Badges
The official conference name badge must be worn for access to all conference educational sessions, exhibit hall and social functions. For your safety, do not wear your badge outside the convention hotel.

Continuing Education Accreditation
The Association of Nurses in AIDS Care is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation. Participants who attend sessions and complete on-line CNE evaluations may be eligible for up to 20 hours of CNE. Links to CNE evaluations will be provided to attendees thru a post-conference email and are available through the conference app.

Evaluations
Conference evaluations are important to the planning of future conferences. Following the conference, attendees will receive an email that includes instructions for accessing conference evaluations.

Please call Erin Myers at 330-670-0101 for more information about CNE or evaluations.

Colorado Ballroom
This room is located on the lower level of the hotel. Please also feel free to ask hotel staff or ANAC staff for assistance.

Gala Reception
All attendees are invited to attend the gala reception at 7:30 p.m. on Thursday. There will be food served with a cash bar and will feature local entertainment followed by a DJ for dancing.

The theme for this year’s gala is Colorado Gold Rush. Costumes are optional.

Awards Ceremony
The awards ceremony will be held on Saturday evening following the Celebration of Life.

Food will be served and a cash bar will be available. You can then spend time with your new and old friends and enjoy your last evening in Denver. Please note that there is a cost of $30 to attend the awards ceremony and this is not included in your registration.

Celebration of Life
The Celebration of Life will be a short but powerful gathering to remember those we have lost, celebrate our collective spirit and share memories of friends and family. It will be held on Saturday, Nov. 10 at 5:30 p.m. in Colorado GHII.

Poster Session
Posters represent research, clinical practice, administration and education projects developed by our membership. Please check the conference schedule for poster session times.

Student Poster Award
The student poster award winner will be announced on Friday at 1 p.m. in the Exhibit Hall.

Exhibits
Exhibits are located in the Colorado Ballroom. ANAC welcomes government agencies, community-based organizations, pharmaceutical companies and many others to showcase their exhibits. Please check the conference schedule for day and time, complimentary lunch and snack breaks.

This year we will hold a series of events in the Exhibit Hall, including lunch and posters on Thursday and Friday, and a raffle on Saturday.

To participate in the raffle, visit and get stickers on your exhibit card from 12 booths during the conference and drop your card at the registration desk before 10:30 a.m. on Saturday to be entered in a prize drawing.

ANAC Annual Business Meeting
Lean more about the operations, programs and finances of ANAC. Meet current and newly elected ANAC board members. All ANAC members are encouraged to attend. This meeting will be held on Thursday, November 8 at 5:45 p.m. in Penrose.

New to ANAC & HIV Session
All registrants that are first-time attendees are urged to attend this session. This session will give you an overview of the organization and the annual conference. You will find this a very worthwhile use of your time.

ANAC Merchandise Booth
All registrants are encouraged to stop by the ANAC merchandise booth, located on the lower level. Open during registration hours.

Satellite Sessions
Satellite sessions are sponsored sessions that provide information about a product or service. Meals are provided and admission is limited and on a first come, first served basis.

Conference App
There is a free downloadable app for conference information and a help desk for the app at the registration area. The app provides information on the schedule, speakers, exhibitors, Denver and obtaining CNE. It’s also a way to communicate with other conference attendees. Download the app at https://crowd.cc/s/1FJTK

Social Media
Attendees are welcomed and encouraged to promote the conference and specific sessions on social media using the hashtag #ANAC2018.

The HIV/HCV and Opioids Syndemic: Data, Services, and Policy Trends

This session will explore the connections between the opioid epidemic, the nationwide resurgence in HCV and recent HIV outbreaks in new communities. Using amfAR’s Opioid and Health Indicators Database and other public sources, the session will discuss how to learn about the impact on your state and community. We will also discuss policies at the federal, state and local levels that can help turn the tide, and how to find out what your state is or is not doing to battle the opioid epidemic.

9 – 11 a.m.
On-site skills building workshops
(pre-registration required)

HIV Prevention from your Sofa: Building a Rural TelePreP Network
Colorado GH

Sexual Health Harm Reduction in Denver
Colorado UJ

Noon – 3 p.m.
Committee meetings
(see page 3 for schedule)

2 – 6 p.m.
Research workshop
Secondary Data Analysis: Get in Where you Fit
Nat Hill
(pre-registration required)
On-site Skills Building Workshops

Wednesday, November 7
8 a.m. – 5 p.m.
Room: Penrose 1

Providers Clinical Support System (PCSS) Medication Assisted Treatment (MAT) 8 Hour Waiver Training

PCSS is a program funded by the Substance Abuse and Mental Health Services Administration (SAMHSA) created in response to the opioid overdose epidemic to train primary care providers in the evidence-based prevention and treatment of opioid use disorders (OUD). PCSS provides this free Medication Assisted Treatment (MAT) waiver training for providers. This training allows providers to seek a waiver to prescribe buprenorphine in office based treatment of OUD. To obtain the waiver to prescribe, physicians are required to take eight hours of training and NPs/PAs are required to take 24 hours of training including this eight hour MAT training.

Laura Martin, MD

Wednesday, November 7
9 – 11 a.m.
Room: Colorado GH

HIV prevention from your sofa— Building a Rural TelePrEP Network

In this session we will review steps to establish and implement a telemedicine PrEP program and review experiences at University of Colorado. This presentation will cover an overview of HIV prevention needs in rural underserved areas, telemedicine, legal regulations and licensure requirements, reimbursement mechanisms, challenges and opportunities, and future directions.

Donna McGregor, RN MSN ANP-C
Lisa Lawrence, MSW

Wednesday, November 7
9 – 11 a.m.
Room: Colorado IJ

Sexual Health and Harm Reduction in Denver

Introduction and information about Rocky Mountain Cares and Denver Health Foundation. They will discuss their different community programs including rapid HIV, HCV testing, harm reduction/needle exchange program and a short tour of their mobile bus testing unit. Session will conclude with Q&A.

Quinn Patton, Prevention Supervisor, Rocky Mountain Cares
Jesse Chavez, Denver Health Department
Lisa Raville, Executive Director, Harm Reduction Action Center Denver

Research Workshop

Wednesday, November 7
2 – 6 p.m.
Room: Nat Hill

Secondary Data Analysis: Get in Where you Fit in

Topics will include maximizing the use of CFAR (Center For AIDS Research) data to advance HIV-related nursing science, how to establish a collaborative line of research using SDA and advantages/challenges of SDA (Secondary Data Analysis) vs. other approaches.

8 – 9 a.m.
Room: Colorado GH

Are you new to ANAC and/or HIV?
All registrants that are first-time attendees are urged to attend this session. It will give you an overview of the ANAC organization and the annual conference. You will learn more about the healthcare community surrounding HIV/AIDS care and the role ANAC and its members play.
Committee leaders are encouraged to attend.

Keynote Speaker

Thursday November 8
10:15 – 11:30 a.m.
Room: Denver Ballroom

Spirituality and Health: Mind, Body and Spirit: An Intersectional Approach
Using a didactic group process, this presentation will discuss the current research articulating the correlation between religiosity, spirituality and health outcomes among millennials and persons of color. A discussion of intersectionality and how the intersection of race, class, gender and socio-economic status conflates to predict health status will be presented. This presentation will also discuss sex, sexuality, spirituality and homophobia/heterosexism and examine how our internalization of these “isms” has adversely affected communities of color in addressing social and health.

Rev. Tommie Watkins, Jr.
PhD, MDiv, LMSW
Concurrent Sessions

Thursday, November 8
1:15 – 2:15 p.m.
Room: Colorado GH

Cardiovascular Health & HIV: Best Practices Across Settings

With medication advances, people living with HIV (PLHIV) have experienced a marked improvement in their lifespan. This success allows PLHIV, clinicians, and researchers to widen their focus to improve the quality of life and prevent other non-HIV related chronic conditions. HIV is a risk factor for cardiovascular disease (CVD), which has created new challenges for both PLHIV and their clinicians. As the number of PLHIV with CVD is rapidly rising there is a recognized and growing need to promote cardiovascular health before disease develops.

Advances in Antiretroviral Therapy

This session will review newly licensed antiretroviral agents, updated treatment guidelines and some safety concerns with ART. Intended for prescribers and others interested in ART therapies.

Steven C. Johnson, MD

Thursday, November 8
1:15 – 2:15 p.m.
Room: Penrose 2

Up in Smoke: Marijuana-related Issues to Consider in HIV Care

This session is geared towards providers wanting to learn more about concomitant use of marijuana and highly active antiretroviral therapy. It will focus on pharmacotherapy, pharmacokinetics, drug interactions, side effects and potential adverse drug events.

Jasjit Gill, PharmD, RPH

Thursday, November 8
1:15 – 2:15 p.m.
Room: Nat Hill

Now that we have antiretrovirals, why do we need palliative care?

Antiretrovirals have made a big difference in the way we provide care for PLWH. Not too many years ago, a diagnosis of HIV infection meant several years of declining quality of life and eventual death - with an obvious need for palliative care to ease suffering. Then powerful antiretrovirals became the standard of care, PLWH began to live, and HIV infection is now treated more as a chronic disease. So, why do we need palliative care? This presentation will answer that question and will also provide the latest information on advance directives.

NOTES

Concurrent Sessions

Thursday, November 8
3:15 – 4:15 p.m.
Room: Penrose 1

Utilizing Trauma-Informed Care to Facilitate Engagement in HIV Care with Transitional Age Youth Living with HIV

Transitional age youth living with HIV experience high rates of substance use and often have experienced trauma. Trauma Informed Care has shown to be an effective way of engaging different populations into care. However, access to trauma-informed substance abuse treatment for YLWHA is limited. This session will explore the model of trauma-informed care, ways to implement trauma informed care in various medical and behavioral health environments that serve HIV positive individuals, and present one successful example of utilizing Psychiatric Mental Health Nurse Practitioner students to facilitate a trauma-informed substance abuse treatment group utilizing the Seeking Safety program.

Thursday, November 8
3:15 – 4:15 p.m.
Room: Penrose 2

The Intersection of Food and Drugs: Maximizing Nutritional and Medical Outcomes in HIV

Nutritional needs for persons living with HIV have changed over the past decade in the US as there is less wasting and more obesity, hypercholesterolemia, osteoporosis, and other nutritional-related conditions. With the introduction of newer antiretroviral medications, it has become more apparent there is a unique relationship between nutritional therapy and drug therapy that carry importance in achieving positive outcomes. This session will explore the current state of nutritional needs of persons living with HIV and identifying relevant medication-related problems to reduce drug-induced diseases related to nutrition and mitigate drug-food interactions.

**Hepatitis C: An update on screening, evaluation and treatment for 2018**

During this session, the presenter will review current guidelines for the screening and evaluation of HCV mono- and co-infected adults. Through the use of case studies the presenter will discuss treatment and management of HCV-positive patients in the clinical setting.

*Patricia A. Cioe*
PhD, CNP

**HOPE: An integrated nursing approach to solid organ transplant care for people living with HIV**

Since 1988 HIV infection has been a contraindication to organ donation and approximately 500-600 organs are discarded annually due to the HIV+ status of potential deceased donors. In 2013, the HIV Organ Policy Equity (HOPE) Act was signed, allowing research of organ donation from HIV+ donors to HIV+ recipients and in 2015, the DHHS released its final safeguards and research criteria for the transplantation of HIV+ organs.

Cochran and Brown have worked closely with colleagues in transplant, infectious disease and research to develop an integrated nursing approach to solid organ transplant care for people living with HIV. These efforts have the potential to effect practice and policy around the U.S. and to increase access to organ transplant for PLWHA.

*Willa Cochran*
BSN, MSN, CRNP

**Protecting our HIV Patients from Viral Hepatitis: How Are We Doing?**

This session will present data from the CDC’s Medical Monitoring Project (MMP) describing care providers’ successes and failures in protecting their HIV patients from viral hepatitis infections. It will also discuss findings of the MMP Provider Survey describing the quality of HIV care delivered by nurse practitioners, physician assistants and physicians.

*John Weiser*

ANAC Annual Business Meeting

Thursday, November 8
5:45 – 6:45 p.m.
Room: Penrose 1 and 2

Hear about the programmatic accomplishments of ANAC along with the financial stewardship of the organization. All ANAC members are encouraged to attend.

ELECTION RESULTS
The new members of the board of directors will be installed at the annual business meeting.

Directors-at-large: Erin Athey, Marik Moen, Stephen Perez and David Vance

Treasurer: Mitchell Wharton

Incoming nomination committee members: Debra Kosko, Victoria Langston and Aleida Torres

We gratefully acknowledge the service of the following members whose terms expire and are rolling off the board of directors. Thank you to Joachim Voss, Gwen Childs, Dennis Flores and Judy Wessell.

Gala Reception

Thursday, November 8
7:30 – 10 p.m.
Room: Denver Ballroom

ANAC2018 attendees will enjoy food served with a cash bar. A DJ will provide an atmosphere for networking and fun. We hope to see you there!

The theme for this year’s gala is Colorado Gold Rush. Costumes are optional.

Cultural Awareness and Implicit Bias

Persisting disparities in HIV/AIDS among racial, ethnic and other underserved communities demand a closer examination of potential implicit bias of care providers which has been shown to be present in healthcare settings. There is credible evidence that has shown the impact of implicit bias on effective communication between care provider and patient with potential impact on treatment adherence and care seeking behavior.

**JANAC Article of the Year**

Focus Group Findings to Develop an HIV/STI Prevention Program for Heterosexually Active Black Adolescents with Mental Illnesses

In the article, Dr. Brawner and colleagues elevate the voices of a population largely absent from HIV prevention literature—heterosexually active black adolescents dealing with mental illnesses. The psychological sequelae of their conditions (e.g., loneliness, impulsivity) may increase their risk for HIV/STIs, yet few interventions exist that address these concerns. Through focus groups with 33 black adolescent males and females, the research team uncovered social, cultural, and psychological factors that influence HIV/STI risk-related sexual behaviors in the target demographic.

Highlights from the 22nd International AIDS Conference

Highlights from the international AIDS conference held July 22-28 in Amsterdam will be presented. Nurse leaders will discuss key developments from the important HIV/AIDS meeting through the unique lens of the nursing perspective. Topics include clinical developments focused on the U=U campaign, the impact of the growing youth bulge on HIV prevention and care and issues that impact the global nursing workforce.

Carole Treston, RN, MPH, ACRN, FAAN
Shaun Watson, chair, UK National HIV Nurses Association
Mitchell Wharton, PhD, RN, FNP-BC, CNS

**Open Global Session**

**Saturday, November 10**

8–9:30 a.m.
Room: Penrose 1

Hosted by the ANAC global committee, this interactive session will provide a recap of nursing perspectives from the International AIDS Conference and feature facilitated dialogue on strategies to enhance nursing education, practice and leadership in the global response to HIV/AIDS. Your ideas and experience are important to ANAC as we plan for the future!

*Presenters:*
- **Dalmacio Dennis Flores**, PhD, ACRN
- **Dina Patel**, RN, MSN, AC-PNP
- **Carole Treston**, RN MPH ACRN FAAN
- **Suzanne Willard**, PhD, APN-c, FAAN

**Plenary Speaker**

**Saturday, November 10**

9:45–10:45 a.m.
Room: Denver Ballroom

**LGBT Civil Rights and Healthcare**

**Service Beyond the Uniform: Military Service and the Path to a More Perfect Union**

This plenary, drawing on the speaker’s background as a naval officer, civil rights advocate and healthcare leader, will discuss the role military service has on advancing minority rights in the United States. For minorities, the ability to serve in the United States Armed Forces has been a catalyst for the advancement of civil rights throughout American history. When the military has enacted discriminatory policies, broader national policy has perpetuated prejudice and discrimination including contributing to health care inequity. This will be highlighted by describing the status of transgender military service. When the military has embraced diversity and inclusion it has been able to set the standard for civilian institutions. Through the lens of lesbian, gay, bisexual and transgender (LGBT) military service, the plenary will describe the history of evolving military personnel policies as well as the implications and effects such change has on broader society regarding civil rights and health care.

*Paula M. Neira*

HIV Criminalization — What matters in 2018!

In this session, the impact of on-going HIV criminalization on stigma, engagement and retention in care and the role that nurses can play in reducing these barriers for optimal health care and quality of life for people living with HIV will be examined. Learn firsthand about the accomplishments of empowered PLWH in updating HIV criminal law in Colorado and how that can translate to other states. We will also explore the fears, myths and benefits of molecular HIV surveillance for cluster outbreaks within the framework of HIV criminalization.

11:30 a.m. – 12:30 p.m.
Room: Colorado IJ

RAPID ART: Getting Closer to Zero

In 2013 a pilot project was undertaken at San Francisco General Hospital with the goal of providing same day ART to persons newly diagnosed with HIV, with an emphasis on identifying those in acute infection. Since that time there have been several international studies supporting the benefits of early ART initiation. RAPID ART has become a standard of care at Ward 86 with over 200 patients having been initiated on early treatment. Initiation of ART has become the expectation of our patients, resulting in high rates of viral suppression and retention in care. Along the way there have been successes, challenges and lessons learned. RAPID ART is an important tool in reaching our goal of no new infections, no stigma, no HIV-related deaths and bringing us closer to ZERO.

Demystifying ANAC's Conference Abstract Submission Process: Making the System Work for You

The ANAC submission process for conference abstracts can be complex and difficult to navigate, especially for those unfamiliar with the process. Even for the most seasoned of presenters, it is important to become familiar with the abstract review process and objectives to meet in order to submit high-quality abstracts. The purpose of this session is to provide practical tips on how to successfully prepare and submit an abstract for presentation at the annual ANAC conference. In addition, the current submission system and forms required at the time of abstract submission will be reviewed.

C. Ann Gakumo, PhD, RN

Cognitive Assessment for HAND: HIV-Associated Neurocognitive Disorder in Older Adults

Cognitive assessment is an advanced nursing skill set that involves evaluation of patients who offer complaints about memory, attention, orientation, executive function and language. In this presentation, the collective diagnostic term, HAND—HIV-Associated Neurocognitive Disorder—will be discussed as it applies to older, HIV-positive persons. Background information, use of selected screening tools and application to clinical practice will be the focus of this session.

Craig R. Sellers
PhD, MS, RN, AGPCNP-BC, GNP-BC, FAANP

The Role of Healthcare Providers in Combating Human Trafficking

The Annals of Health Law published a report by Laura J. Lederer showing that 87 percent of 200 human trafficking survivors interviewed reported seeing a health care provider while they were still under the control of a trafficker (December 2014). This workshop equips nurses to understand types of human trafficking and identify potential victims. Applying trauma-informed care models to interaction with victims who present with a trafficker will equip nurses to identify control and coercion techniques and know how to report potential cases. Participants will understand their role in a multidisciplinary approach to identification, intervention, referral, and reporting for victims.

Sandra Morgan
PhD, RN

An Introduction to the All of Us Research Program

Dr. Norma Cuellar, PhD, RN, FAAN will present an overview of the All of Us Research program, a historic effort by the National Institutes of Health to gather data from one million or more people living in the United States to accelerate research and improve health. Unlike research studies that are focused on a specific disease or population, All of Us will serve as a national research resource to inform thousands of studies, covering a wide variety of health conditions.

Dr. Cuellar will discuss the important role providers can play, paths to participation and enrollment, and the program’s focus on enrolling diverse participants who have historically underrepresented in clinical research.

Two-Spirit Gifts & Medicines: Dreams, hopes & healing

Many cultural traditions and practices of the peoples of Turtle Island have often been misrepresented or suppressed. This especially holds true for indigenous notions and practices of sex, gender, gender-roles and sexuality. This presentation explores these concepts by featuring some of the sociohistorical documentation from a nation-specific standpoint while supplementing these records and narratives with deconstructed colonial narratives and/or accounts. A brief overview is offered on how this burgeoning body of knowledge is used to (re)claim and restore respect, honor and dignity for today’s Two-Spirit individuals and communities as they navigate and negotiate Native and LGBTQI+ spaces, places and communities. Finally, a discussion is taken up on the (re)positioning of Two-Spirit as this work and discussions significantly differs from that of the (non-Native) LGBTQI+ movements. It will include a critique of the ‘western’ framing of sex, gender, gender-roles, and sexuality opening up a space that transcends and challenges the binary creating a space to dream of a rich, complex and diverse world that acknowledges “other” while honoring, celebrating and valuing the gifts and medicines the “other” has to offer.

Harlan Pruden
BA, PhD student

Celebration of Life

Saturday, November 10
5:30–6:30 p.m.
Room: Colorado GHJ

The Celebration of Life will be a short but powerful gathering to remember those we have lost, celebrate our collective spirit and share memories of friends and family.

Awards Ceremony

Saturday, November 10

Room: Denver Ballroom

The awards ceremony will be held after the Celebration of Life. Please note there is an additional $30 fee to attend the awards ceremony. Food will be served and a cash bar will be available.
Advancing HIV Research, Education, Prevention and Care

Programs and Initiatives Include:

François-Xavier Bagnoud Center (FXB Center)—Focuses on collaborative development of sustainable programs for vulnerable women, children, youth and families, including those affected by HIV. The FXB Center is the home of the AIDS Education and Training Center (AETC) National Coordinating Resource Center (NCRC) and other important HIV-related programs. For information, contact Andrea Norberg: norberan@sn.rutgers.edu

Center for Research on HIV Management in Families and Communities—Supports and promotes collaboration on HIV-related research conducted by faculty, staff, and students at Rutgers and beyond. For more information, contact Ann Bagchi: ann.bagchi@rutgers.edu or John Nelson: nelsonj3@sn.rutgers.edu

HIV Care Advanced Practice Nursing Specialization—Educates doctor of nursing practice (DNP) students to provide primary patient care, focusing on patients living with HIV. Current nurse practitioners may pursue the program as a specialty certificate. For information, contact Darcel Reyes: darcel.reyes@rutgers.edu
