Getting to Zero among Black MSM in the American South: Testing the Efficacy of an Integrated Intervention Strategy to Accelerate Ending the HIV Epidemic (HPTN 096)

LaRon Nelson, PhD, RN, FNP, FNAP, FAAN
Associate Dean, Global Affairs & Planetary Health and Independence Foundation
Associate Professor, Yale School of Nursing

Dr. Nelson is the associate dean for Global Affairs & Planetary Health and the Independence Foundation and associate professor at the Yale School of Nursing. He is also the Ontario HIV Treatment Network Research Chair in Implementation Science with Black Communities at the MAP Centre or Urban Health Solutions at St. Michael’s Hospital in Toronto Canada. He is the protocol co-chair for HIV Prevention Trials Network (HPTN) 096 a community-randomized controlled trial (RCT) to test an integrated, HIV status-neutral, population-level health equity approach to increasing rates of HIV testing, pre-exposure prophylaxis uptake, and HIV viral suppression among Black men who have sex with men (MSM) in the southern United States. He is also leading an NIH-funded RCT investigating a multi-level intersectional stigma-reduction intervention for its efficacy in improving rates of HIV testing among MSM in Ghana.
