

Association of Nurses in AIDS Care

MISSION

ANAC fosters the professional development of nurses and others involved in the delivery of health care for persons at risk for, living with, and/or affected by the human immunodeficiency virus (HIV) and its comorbidities. ANAC promotes the health, welfare and rights of people living with HIV around the world.

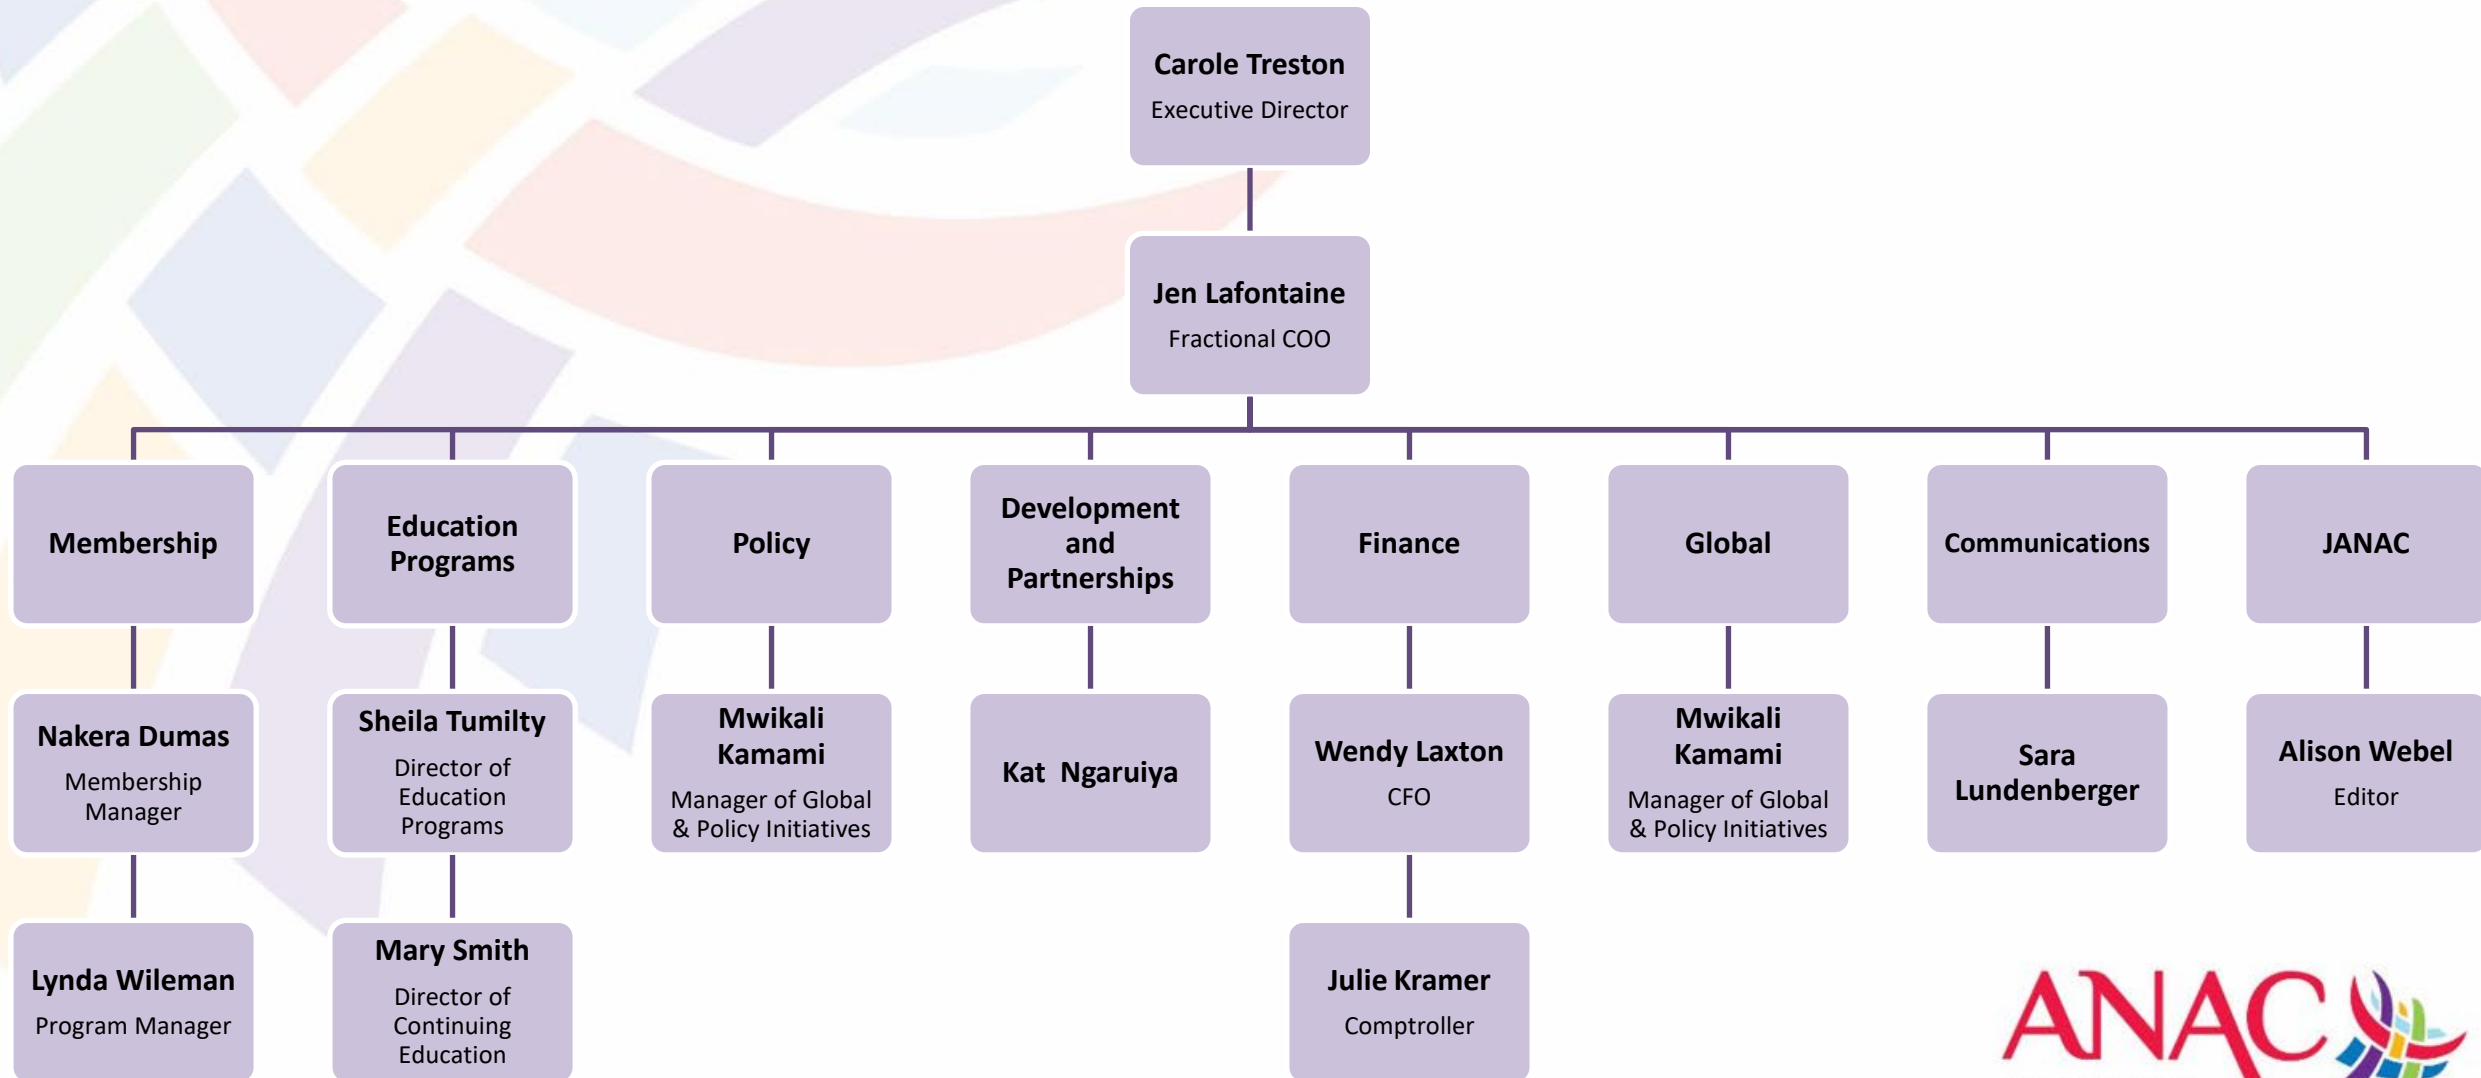

Founded in 1987, we achieve our mission by:

- Creating an effective network of nurses and others in HIV care
- Studying, researching and exchanging information, experiences and ideas leading to improved care for persons with HIV/AIDS
- Providing leadership to the nursing community in matters related to HIV/AIDS
- Advocating for people living with HIV
- Promoting social awareness of issues related to HIV/AIDS

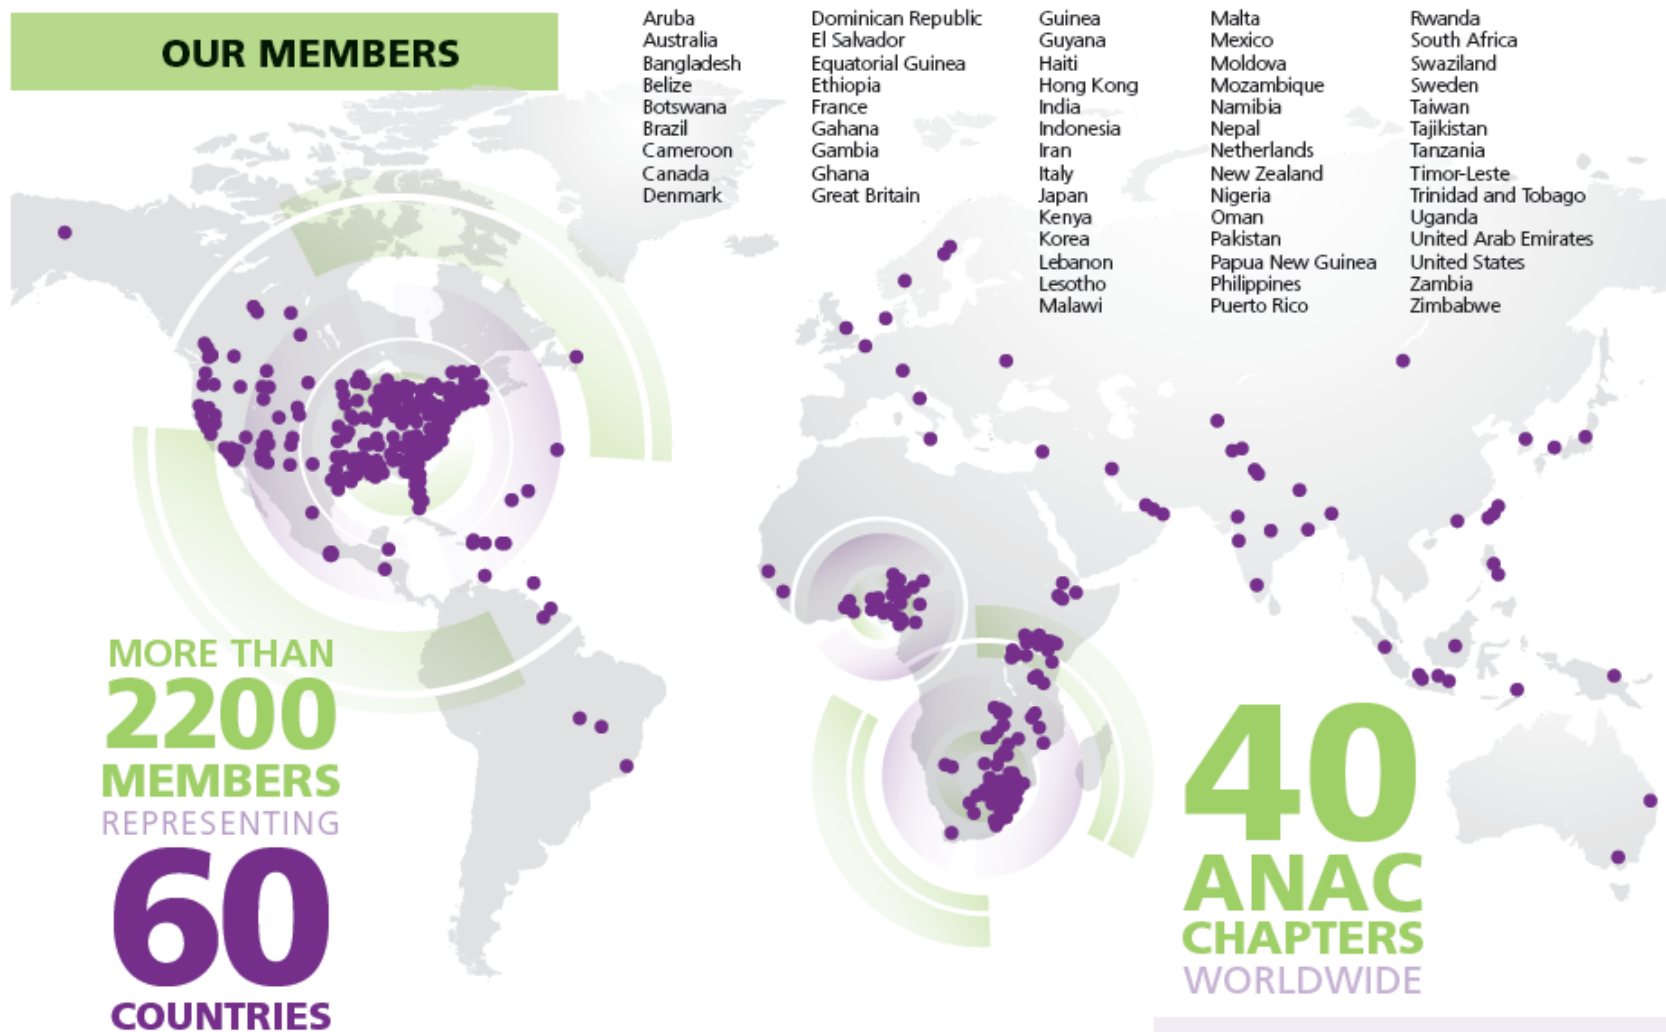

Inherent in these goals is the abiding commitment to the prevention of further HIV infection.

Professional Development

At the core of ANAC's mission is the commitment to provide professional development opportunities for nurses involved in HIV, viral Hepatitis and other infectious diseases.

Continuing education through a variety of formats and opportunities provides the basis for nursing practice.

Contact hours are available by attending ANAC's annual conference and other educational activities throughout the year.

Affiliations and Accreditations

ANAC is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

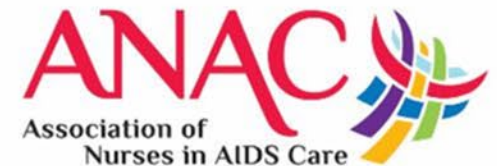

JANAC is a peer-reviewed journal and invites original articles from nursing and other disciplines such as social work, public health and medicine, that focus on clinical practice, health services, education, research, law, ethics and social-medical issues.

The HIV/AIDS Nursing Certification Board is a nonprofit professional organization. Our mission is to improve the quality of HIV nursing care and prevention, promote competency of nurses caring for persons with HIV and recognize this professional achievement through a certification and recertification process.

International Nursing Network for HIV/AIDS Research

Links nurse scientists and clinicians to improve the health of persons at risk for, living with, and affected by HIV through rigorous, cross cultural and international research. Network members actively identify, mentor and train nurse scientists and work with others to develop an international agenda for relevant HIV research.
